

Benefits of buying from "Sprinturf" using CMAS

The "Official" Factor: CMAS (California Multiple Award Schedule) is a legal contract between the State of California and Sprinturf administered by the Department of General Services Procurement Division which allows direct purchasing of products and services without the need for a bid process - already with proven results.

The "Money" Factor: The price is totally negotiable between Owner (ordering agency) and Sprinturf with an upper limit specified in our CMAS contract (#4-04-72-0033A valid through 4/30/2014).

The "No Fuss" Factor: The Sprinturf contract simplifies the purchasing process. There is no longer the need to formulate detailed bid documents, write product specifications or wait for a formal bid process to occur.

The "Partnership" Factor: Bid documents are therefore only needed to reflect the base & drainage construction. Sprinturf will assist in this regard with advice following their experience of constructing over 500 synthetic turf fields.

The "No Hassle" Factor: Unnecessary protests, substitution requests, arguments with dissatisfied suppliers, creating time delays, are also eliminated.

The "Win-Win" Factor: The purchaser/owner is able to obtain their chosen product at market prices, without the uncertainty, as well as time required to go through the bid process.

The "Enhancement" Factors: Sprinturf Ultrablade™ Synthetic Turf Systems presently represent the state-of-the-art in synthetic turf systems. The Ultrablade family of products provide unprecedented turf performance breakthroughs such as:

- Better resilience than normal Polyethylene fibers
- Better consistent play performance
- Natural grass look and feel

This revolutionary fiber is far more resistant to natural wear and tear – "Ultrablade" does not split into smaller "grass blades" during its life, thereby creating better playing characteristics without the risk of nasty skin burns and injuries.

With Sprinturf Ultrablade, amazing durability and far greater intensive use is possible! Sprinturf Synthetic Turf Systems also incorporate a proprietary backing system, utilizing woven and non-woven layers that provide unrivaled directional stability.

Sprinturf Synthetic Turf Systems are also available with our unique Coolfill™ rubber infill designed to provide significant reduction to the heat on the playing surface and coated with Microban® for added antimicrobial protection.

For more information about CMAS or the Sprinturf product line, contact our Western Region Office at 949-753-2857 or sent an email to Diedre Sheldon at dsheldon@sprinturf.com.
